

The Chef's Garden

AVAILABILITY GUIDE

December/January 25

THE PRODUCT

Our seasonal vegetable crops are immensely versatile and have a special place in every chef's kitchen. Served raw or cooked, their natural sweetness and bright colors captivate the eye and please the palate.

ALLIUMS

Enhance your dishes with alliums for spicy sweetness, including fresh onions, such as our sweet and mild petite purplette onions and leeks. Alliums also include herbs such as garlic roots that are peppery and intense, tender and crisp – and fresh chives.

BEANS & PEAS

As spring and summer seasons unfold, our farm comes alive with an abundance of fresh beans and peas, including Carmellini®, French, Wax, English and Snow Peas. Each offering a unique flavor profile and nutritional richness, quality and taste.

CRUCIFEROUS

Vegetables in the cruciferous family come in tremendous varieties of flavors and colors including broccoli, cauliflower, kale, Brussels sprouts, swiss chard, and kohlrabi.

EDIBLE FLOWERS

Beyond the beauty of a delicate bloom on the plate, our edible flowers can be used as flavor components in your dishes. The peppery nasturtium, sweet borage flower and herbal lavender bloom, for example, each add a subtle nuance to the bite.

GREENS

Some types of fresh greens include sweet and mild green ruffled mustard; red magma mustard that begins with a taste of sweet mustard, then ends with a burst of peppery heat; and red ruffled mustard that is sweet and peppery, delicate, and chewy.

HERBS

The enticing fragrance of fresh herbs – from basil to mints to lavender, and more – is second only to flavors they can impart. With too many varieties to name them all, each with its own distinctive taste, using herbs in your cuisine can enhance the flavor of a dish.

LETTUCE

With our fresh lettuce, you can create a salad that can be appreciated as much as the entrée! The assortment of flavors and textures we have available in our lettuces is unmatched.

PEPPERS

We offer a wide range of peppers, including sweet and hot peppers in a spectrum of eye-catching colors that offer a rainbow of nutrition. You can choose the best of the day's harvest in sweet peppers or hot peppers—or both!

ROOT CROP

Root vegetables are immensely versatile and have a special place in every chef's kitchen. Served raw or cooked, root vegetables have a natural sweetness and bright colors to captivate the eye and please the palate.

SUMMER SQUASH

Squash has a special place in our hearts because it was a squash blossom that led us to grow for chefs. Squash has a thin and crisp skin that contains a tender, juicy flesh with a mild sweet, and nutty flavor. It is available with or without the bloom and by the piece or by the case.

TOMATOES

Tomatoes begin to trickle in; by June and July, we're in full tomato production with our larger toy box and heirloom sizes. The unbelievable diversity of heirloom varieties means you can enjoy a different flavor and texture every day in season.

TUBERS

What's one of our most hearty, comforting vegetable offerings? Potatoes! They provide unexpected diversity in flavor, texture, color, and size, with flavors. Let's not forget our seasonal favorites like Jerusalem artichokes and crosnes!

MICROGREENS

@alexanderprosenickov
Dry Aged Duck| Vanilla Parsnip Puree| Fennel Braised in Orange Juice| Huckleberry| Blackberry| Jus made with Blackberry and Juniper

@ baronson1st
Sometimes, a dish is so stunning it feels like a work of art—and that's exactly how we feel about our chopped salad. A symphony of colors, textures, and fresh flavors, it's almost *too beautiful to eat*... almost!
