

The Chef's Garden

AVAILABILITY GUIDE

August/September 26

THE PRODUCT

Our seasonal vegetable crops are immensely versatile and have a special place in every chef’s kitchen. Served raw or cooked, their natural sweetness and bright colors captivate the eye and please the palate.

scan the QR code

ALLIUMS

Enhance your dishes with alliums for spicy sweetness, including fresh onions and leeks. Alliums also include garlic roots and fresh chives.

BEANS & PEAS

As spring and summer seasons unfold, our farm comes alive with an abundance of fresh beans and peas, including Carmellini®, French, Wax, English and Snow Peas. Each offering a unique flavor profile and nutritional richness, quality and taste.

CRUCIFEROUS

Vegetables in the cruciferous family come in tremendous varieties of flavors and colors including broccoli, kalettes, cauliflower, and kale.

EDIBLE FLOWERS

Beyond the beauty of a delicate bloom on the plate, our edible flowers can be used as flavor components in your dishes. The peppery nasturtium, sweet borage flower and herbal lavender bloom, for example, each add a subtle nuance to the bite.

GREENS

Some types of fresh greens include sweet and mild red ruffled mustard; bowtie arugula that provides an initial sweet nuttiness and finishes with a peppery zing; and spinach that is known for its deep green color, and a clean, earthy flavor that adds richness and body to any dish.

HERBS

The enticing fragrance of fresh herbs – from basil to mints to lavender, and more – is second only to flavors they can impart. With too many varieties to name them all, each with its own distinctive taste, using herbs in your cuisine can enhance the flavor of a dish.

LETTUCE

With our fresh lettuce, you can create a salad that can be appreciated as much as the entrée! The assortment of flavors and textures we have available in our lettuces is unmatched.

PEPPERS

We offer a wide range of peppers, including sweet and hot peppers in a spectrum of eye-catching colors that offer a rainbow of nutrition. You can choose the best of the day’s harvest in sweet peppers or hot peppers—or both!

ROOT CROP

Root vegetables are immensely versatile and have a special place in every chef’s kitchen. Served raw or cooked, root vegetables have a natural sweetness and bright colors to captivate the eye and please the palate.

SUMMER SQUASH

Squash has a special place in our hearts because it was a squash blossom that led us to grow for chefs. Squash has a thin and crisp skin that contains a tender, juicy flesh with a mild, sweet, and nutty flavor.

TOMATOES

Tomatoes begin to trickle in early, but by June and July, we’re in full production with our larger mixed heirlooms, toy box varieties and mixed baby specialty tomatoes. The incredible diversity of heirloom varieties means you can enjoy a different flavor and texture every day of the season.

TUBERS

What’s one of our most hearty, comforting vegetable offerings? Potatoes! They provide unexpected diversity in flavor, texture, color, and size, with flavors. Let’s not forget our seasonal favorites like Jerusalem artichokes and crosnes!

MICROGREENS
